

Neuropathology and its application in MRI interpretation – ESAVS 5-day Course

Special discount price for Residents! /// 26 – 30 June 2023 at the University of Berne, Switzerland

For all those who wish to improve or reinforce their knowledge in the field of neurology, pathology, diagnostic imaging or MRI skills, ESAVS is pleased to host an intensive course Neuropathology & MRI Interpretation. Please be informed that this course is planned to take place from 26 – 30 June 2023 at the University of Berne, Switzerland.

BASIC TOPICS

- Introduction into neuroanatomy including practical using brain sections
- Recognizing gross lesion patterns.
- Recognizing microscopic lesion patterns.
- Principles of classification and interpretation of brain and spinal cord lesions
- Principles of MRI reading

These topics prepare the participants for the subsequent lectures and practicals on the interpretation of different lesion types.

SPECIFIC LESIONS

- Malformations
- Inflammatory lesions
- Tumors of the nervous system
- Trauma of the brain and spinal cord
- Infarcts of brain and spinal cord
- Toxic-metabolic diseases.
- Degenerative diseases

For each topic, lectures introduce into typical gross and microscopic pathological findings and practicals train the diagnostic approach and interpretation of gross lesions, histological lesions (with the microscope) and corresponding MRI images. The findings are presented at daily plenary session at the end of the day and discussed.

These topics prepare the participants for the subsequent lectures and practicals on the interpretation of different lesion types
